## About Us

The journey began in the year 1981. One man dreamt of the incredible. He dreamt of manufacturing the most superior quality, reliable and durable bucket handles and steel articles and taking them far and wide across distant horizons. His name- Mr. Ashok Modi. He built a reputation upon a vision which has come a long way. On the cornerstone of his vision, rested the company- Shriram Handles. The evolution of Shriram Handles has come from hard work, and it is hard work that he will continue to put into the brand to allow for growth and progression.

Shriram Handles started its operations in 1972 as a small unit doing labour job of Electroplating. It was getting Bucket Handles for electroplating from other manufacturers, which gave idea of manufacturing Bucket Handles. We started manufacturing only 4000 to 5000 Pcs. per day in a 500 sq.feet area. It has celebrated its silver jubilee 8 years back. In a span of 25 golden years we has established 4 more factories with different names at Vasai & Daman. Today, we have capacity of manufacturing more than 200000 pcs. per day. Our company has capacity of pressing stainless Steel Articles on an average 3 to 5 M.T. per day depending upon gauge and size of articles. We have about 400 workers employed in different units of production who are working sincerely with devotion to duty.
